

CKS.DMS for SAP Business One

Your solution for simple and fast archiving

Easy installation

This innovative add-on, specifically designed for users and SAP consultants, reduces the costs of implementation and training.

Workflow and approval procedures

Documents can be sent to different departments and personnel in the business for approval and release. The visual copy of the original document can always be checked against the digitalised document information such as date of receipt or total sum.

CKS.DMS Web

Access your documents from anywhere in the world and give your customers access to ones that are relevant to them such as outgoing invoices or delivery notes. A browser is all that is needed!

CKS.DMS AP

For fully automatic processing of incoming documents. The SAP document is generated automatically after scanning and can be reconciled with the document that is archived behind it.

Cloud

Benefit from modern technology and lower administration costs while avoiding the expense of purchasing your own hardware when using this solution in the SAP Business One Cloud.

Document flow automation

Creates barcodes automatically for the automatic assignment of paper documents to SAP Business One documents.
